

CLINICARE®

CUTTING EDGE COSMECEUTICAL FORMULA

OUTSTANDING SKIN REJUVENATION & HYDRATION

CLINICARE's special formulations deliver outstanding results due to a unique combination of highly active ingredients. All its products are designed to provide long lasting deep skin hydration and rejuvenation.

LOW MOLECULAR WEIGHT HYALURONIC ACID

CLINICARE's cosmeceutical range delivers optimal concentrations of its signature low molecular weight Hyaluronic Acid, as well as Vitamins, Antioxidants, Peptides and other powerful active ingredients.

COMBINES THE BEST OF NATURE & SCIENCE

CLINICARE's entire offering is cruelty-free and 100% vegan. CLINICARE combines nature's pure essential extracts with the latest advances in science to ensure the highest levels of quality, efficacy and safety in all their products.

PROFESSIONAL TREATMENTS

PURE TREATMENT

SKIN CONCERNS

Troubled and/or sensitive skin, prone to blemishes.

This intensely soothing treatment relieves inflammatory conditions and promotes skin cell regeneration.

Low molecular weight Hyaluronic Acid together with calming botanical extracts and antioxidants provides skin with the moisture and nutrients it requires to target imperfections, provide a long-lasting antibacterial effect and stimulate the natural skin cell renewal process. The result is a clearer, healthier looking complexion.

GLOW TREATMENT

SKIN CONCERNS

Targets hyperpigmentation, age spots and dull tired skin.

Revive tired, uneven and dull looking skin and brighten pigmentation, often caused by sun exposure, with this targeted treatment.

Powered by Arbutin and antioxidant-rich extracts to effectively target skin concerns such as melasma, age spots and hyperpigmentation. It also features low molecular weight Hyaluronic Acid for long-lasting, skin-plumping hydration. The result is restored luminosity and a brighter, more radiant complexion.

REFRESH TREATMENT

SKIN CONCERNS

Fine lines, wrinkles and dehydrated skin.

An anti-ageing treatment for combating and preventing signs of ageing, stimulating collagen synthesis and restoring radiance.

Low molecular weight Hyaluronic Acid and antioxidants lock in moisture and help repair skin tissue damaged by stress and environmental factors. Also starring active ingredients, such as Argireline, which have a visible lifting and tightening effect. The result will be softened fine lines and wrinkles and revitalised skin.
